

Are you able to bill electronically Medicare and Medicaid in any state?

Yes, we use several clearinghouses and in many cases direct transmission modules to Medicare and Medicaid, when available.

What about electronic transmission to other insurance carriers?

We are able to transmit electronic claims to over 2,500 major insurance carriers across the country.

When can I expect collections to increase?

We provide easy-to-read, detailed reports daily, monthly or as needed. Our managers are always available to discuss the progress toward our mutual goal of increased collections. Our clients have praised our aggressive approach to collections, as well as, our professional attitude, dedication, reliability and customer service. Finally, based on history, our account receivable collections have increase normally within 45 to 60 days after implementing our collection processes.

How fast is your billing turnaround?

The timeliness of our process is unparalleled. We have the manpower to enter your charges in our system and get the resulting claim out the door within 4 to 24 hours after receiving your complete information.

How can I benefit from your service?

Our medical billing experts will take the burden of insurance processing and patient billing and replace it with improved cash flow which in turn will give you more time for the care of your patients.

How will you get paid for your services?

We will invoice you for services rendered once a month, the amount is due upon receipt of the invoice, unless other arrangements have been made.
